EQM-80

EQM-110

Earthquake Industries Inc. delivers the very best in vibration equipment. Earthquake's rugged EQM line of MINI-ELECTRIC Industrial vibrators has all the great features of our ultra heavy duty line but at a fraction of the size. The EQM line consists of 5 sizes ranging from 0 to 110 lbs. of centrifugal force at 3600 VPM. Each vibrator has permanently lubricated bearings and a heavy duty totally enclosed housing to withstand the toughest conditions. The **Earthquake** mini electric vibrators are ideal for small hoppers, chutes, feeding, compacting and ornamental concrete applications. The zero maintenance, silent operation and low cost make the **Earthquake** Mini electric vibrators a favorite in food, chemical, concrete and pharmaceutical industries. **Earthquake's** "lowest price promise" makes the EQM line of vibrators the best buy in the business.

MODEL	FORCE		VOLTAGE AMPS		DIMENSIONS Inches / mm					WEIGHT		dB
