

Earthquake!

VIBRATORS

ASK ABOUT OUR
LOWEST
PRICE
PROMISE!

THE BEST BECAUSE...

- LONGER WEAR RESISTANCE
- NITRIDED PISTONS
- MORE CORROSION RESISTANT
- STEPPED DIAMETER PISTONS
- RUGGED CAST IRON DESIGN
- TAPPED EXHAUST PORT
- VARIABLE FORCE
- LOW AIR CONSUMPTION

APPLICATIONS

- ANTIBRIDGING
- FEEDING
- SCREENING
- COMPACTING
- SEPARATING
- AGITATING

INDUSTRIES

- CHEMICAL
- FERTILIZER
- CEMENT
- FOOD
- MINING
- AGRICULTURE

PERFORMANCE DATA

MODEL	40 PSI		60 PSI		80 PSI		FORCE LBS AT 80 PSI
	VPM	CFM	VPM	CFM	VPM	CFM	
EP - 1	6000	3.9	9200	5.4	11200	6.5	200
EP - 1.5	3000	7	3600	10	3800	12	500
EP - 2	3200	8	3700	10	4000	15	750
EP - 3	3000	17	3100	21	3400	25	1200
EP - 4	NA	NA	1800	2000	2100	35	2000

Earthquake Industries Inc. delivers the very best in vibration equipment.

Earthquake's EP Series piston vibrators are the ideal flow aid for moving materials in bins, hoppers and chutes. Industries such as cement, chemical, agricultural, mining, food and fertilizer call Earthquake Industries Inc. to solve their material flow problems.

Earthquake's EP series Piston Vibrators are engineered for superior performance. Our custom carbon steel MOUNTING BRACKET is designed to transmit the vibratory force with maximum efficiency. The bracket will also eliminate any cracking or fatiguing of the bin by dispersing the vibratory force evenly. This saves you money by helping avoid costly repairs. Earthquake Industries will supply one mounting bracket **free** of charge with every piston vibrator.

Our STEPPED-DIAMETER piston ensures easy starting at any inclination with minimal air pressure. With an Earthquake piston vibrator there is no need for those high maintenance, annoying return springs. The steel piston is hardened using an advanced process known as NITRIDING. This creates a piston with longer wear resistance, better corrosion resistance, improved strength and no distortion. All this in addition to our rugged low alloy cast iron housing will provide you with years of superior performance.

Earthquake's "Lowest Price Promise" guarantees the greatest value for the highest quality in vibration equipment.
